PROFILE

Computer Science Engineering (CGPA: 9.1/10.0) with strong backend software development experience building scalable APIs, database schemas, and data pipelines. Proficient in Python, Java, and SQL, with exposure to cloud platforms (GCP), ETL concepts, and Big Data technologies. Proactive learner with a strong problem-solving mindset, skilled in Agile methodologies, code reviews, and test automation (CI/CD).

TECHNICAL SKILLS & STRENGTHS

- **Programming & Core:** Python, Java, JavaScript, TypeScript, SQL, OOP, Data Structures & Algorithms
- **Backend & Frameworks:** RESTful APIs, FastAPI, Django, Flask, Spring Boot (exposure), Node.js, React
- **Databases & Data:** MySQL, PostgreSQL, MongoDB, SQLite, ETL Concepts, Data Modeling, Big Query (exposure)
- **Methodologies:** Agile (Scrum/Kanban), SDLC, Code Reviews, Design Patterns, QA Collaboration
- **Cloud & DevOps:** GCP (GCS, BigQuery), AWS, Git, GitHub Actions, Jenkins (exposure), CI/CD, Docker, Linux/Unix

EXPERIENCE

Python Developer Intern - Cybernaut Edu-Tech LLP

Feb 2025 – May 2025

Backend & Full-Stack Development

- Developed and tested 5+ Python backend modules and RESTful APIs using OOP concepts, optimizing data pipelines and ETL processes to reduce code duplication by 30%.
- Collaborated on 20+ Git commits in an Agile sprint environment, participating in daily standups, code reviews, sprint planning, and documented 8+ APIs to ensure process reproducibility.

PROJECTS

Research Mind - Multi-Agent AI Research Assistant

Technologies: React, Vite, FastAPI, Python, Gradio, Docker, GCP

- Engineered backend orchestration logic coordinating 6 autonomous AI agents (Planner, Web Research, PDF Reader, Fact Checker, Citation Verifier, Report Writer) into a single distributed processing pipeline.
- Integrated FastAPI backend endpoints with a responsive React frontend, optimizing state management and rendering structured markdown reports with real-time status updates.
- Collaborated on containerized deployment configuration (Docker) and resolved cross-environment build issues, improving overall integration testing efficiency.

AI-First CRM - HCP Module

Technologies: Python, FastAPI, LangGraph, Groq (Gemma-2), React, Redux Toolkit, SQLite

- Built a scalable backend module supporting dual-modality interaction logging via structured forms, reducing manual CRM data entry by 60% and leveraging SQLite for relational data processing.
- Designed a LangGraph agent orchestrating 5 functional tools to parse natural language inputs into structured records with 94% precision, collaborating closely with frontend developers to ensure smooth API integration.

GitPulse - Event-Driven GitHub Automation Bot

Technologies: Next.js 14, TypeScript, Supabase, Google Gemini 1.5 Flash, Slack API, Vercel, AWS

- Architected an event-driven bot that intercepts webhook payloads and logs repository events to a Supabase database, executing relational data modeling and API testing workflows.
- Embedded Gemini 1.5 Flash to automatically summarize PRs/issues and assign labels with 95% accuracy, automating deployment triaging processes.

EDUCATION & QUALIFICATION

Mahendra Engineering College, Tamil Nadu

2022 – 2026

B.E., Computer Science and Engineering | CGPA: 9.1 / 10.0

10th Percentage: 83% | 12th Percentage: 81%

CERTIFICATIONS

SnowPro Associate – Snowflake (2025) • Salesforce Developer Virtual Intern (AICTE | Jul 2024) • ServiceNow Virtual Intern (ServiceNow University | Oct 2025) • Certified Automation Developer Associate – UiPath (2024) • AI Certification – Infosys Springboard (2024) • IBM AI & Cloud Certification – Edunet Foundation + AICTE (2024)

LANGUAGES

English, Tamil, Hindi, Urdu
